

INTELLIGENCE PROCESS COURSE #4-77

13 July - 9 August 1977

Room 912
Chamber of Commerce Building

Telephone Number:

25X1

Functional Training Division
Office of Training

STAFF

25X1A

25X1

COURSE OBJECTIVES

Upon completion of the Intelligence Process Course, the student will:

- Have a basic knowledge of the intelligence process and the interaction that occurs among its several components: intelligence objectives; requirements; sources of collection; processing, storage, and retrieval of information; analysis; production; and presentation.
- Understand the contribution of intelligence to decision-making at the executive level and to supporting the executive level in carrying out national policies.
- Be familiar with the scope of intelligence research and the broad range of analytic methods developed within and used by the Agency and other members of the Intelligence Community to produce finished national intelligence.
- Be conversant with the variety of intelligence publications and production methods that are used to meet the requirements of foreign intelligence consumers.

INTELLIGENCE PROCESS COURSE #4-77
13 July - 9 August 1977

Wednesday, 13 July

Room 912, C of C

0900-1000 Course Introduction

[REDACTED]

25X1A

-Administrative Affairs
-Presentations and Introductions
-Security Arrangements
-Overview and Requirements

Intelligence
Training Branch,
Office of Training

1015-1130 The Intelligence Cycle

[REDACTED]
ITB

25X1A

U.S. positive foreign intelligence is presented as a continuous process involving close interaction between the policy-level user of foreign intelligence and collectors and analysts.

1130-1300 Lunch

1300-1500 Requirements

[REDACTED]

25X1A

The establishment of collection goals and work priorities for both collectors and analysts is one of most important and frustrating tasks of resource managers. During this session, the formal and informal structures for determining what to collect will be explored.

Requirements and

CONFIDENTIAL

1515-1615 Directed Reading:

-History of the Central Intelligence Agency,
Senate Report, pp. 1-107 (to be read as time
permits)

-A Guide to the National Intelligence Community's
Production Organizations and Their Products

-Perspectives for Intelligence; 1976-1981

-The Director of Central Intelligence, Senate Report

-CIA Production of Finished Intelligence, Senate Report

CONFIDENTIAL

Thursday, 14 July

Room 912, C of C

0900-1045 Film: Scientific Intelligence in
World War II

Many of the tenets and practices that underlie intelligence work today were developed in World War II. This film illustrates how finished intelligence, based on and including a meshing of requirements, all-source collection, analysis, and appropriate methods of presentation, affects policy decisions.

1100-1145 Classification and Compartmentation

ITB

25X1A

This session will be a brief review of compartmented clearances, what they mean, and when they are applied; it will include a definition of terms and an explanation of restrictions and caveats.

1145-1300 Lunch

1300-1400 Directed Reading:

-Communication Between the DDO and
DDS&T on Human Source Collection

1415-1515 Film: A Point in Time

This film traces the development of today's overhead reconnaissance systems.

1530-1600 Film: (Restricted title)

This is a special film developed to explain a new imagery collection system.

Friday, 15 July

Intelligence Process Course -- Evaluation Form

Name _____ (Optional)

You will recall there are four principal objectives of the IPC. Now that you have completed the course, you should:

- Have a basic knowledge of the intelligence process and the interaction that occurs among its several components: intelligence objectives; requirements; sources of collection; processing, storage, and retrieval of information; analysis; production; and presentation.
- Understand the contribution of intelligence to decision-making at the executive level and to supporting the executive level in carrying out national policies.
- Be familiar with the scope of intelligence research and the broad range of analytic methods developed within and used by the Agency and other members of the intelligence community to produce finished national intelligence.
- Be conversant with the variety of intelligence publications and production methods that are used to meet the requirements of foreign intelligence consumers.

The IPC undergoes continuous review and modification to achieve maximum utility, and any comments you make -- especially constructive suggestions for improvement -- will be valuable to us in designing the next course. (Use additional paper, if necessary, and do not feel confined to these specific questions; if you wish to discuss any relevant topic, feel free.)

1. Please indicate on the scale below the degree to which the IPC as a whole met its stated objectives:

Slight

Highly Satisfactory

1	2	3	4	5	6	7

2. Identify the most effective or valuable presentations, visits or exercises in the course and explain why.

3. Identify the least effective presentations, visits or exercises and explain why.

4. Please comment on course focus and balance. That is, was proper time devoted to each topic? Were some overdone at the expense of others? Are there any general topics you believe to be pertinent to this class which were not included at all?

END-OF-COURSE DATADATE OF REPORT 18 Aug 77COURSE: Intelligence Process Course No. 4-77

Intelligence Process Course -- Evaluation Form

STATINTL

Name (optional)

You will recall there are four principal objectives of the IPC. Now that you have completed the course, you should:

- Have a basic knowledge of the intelligence process and the interaction that occurs among its several components: intelligence objectives; requirements; sources of collection; processing, storage, and retrieval of information; analysis; production; and presentation.
- Understand the contribution of intelligence to decision-making at the executive level and to supporting the executive level in carrying out national policies.
- Be familiar with the scope of intelligence research and the broad range of analytic methods developed within and used by the Agency and other members of the intelligence community to produce finished national intelligence.
- Be conversant with the variety of intelligence publications and production methods that are used to meet the requirements of foreign intelligence consumers.

The IPC undergoes continuous review and modification to achieve maximum utility, and any comments you make -- especially constructive suggestions for improvement -- will be valuable to us in designing the next course. (Use additional paper, if necessary, and do not feel confined to these specific questions; if you wish to discuss any relevant topic, feel free.)
